

As an American citizen, I am outraged that Sinclair Broadcasting is forcing their stations to air biased propaganda thinly disguised as "news" in a clear effort to help the Bush campaign. This is an example of what happens to the public discourse when a few large (8) corporations control (75%) of the media. It is your job to protect our public airwaves from monopolies, the abuse of power and a defiant political agenda at the expense of the precious values we hold in a democracy. Please act NOW and send a message to Sinclair that democracy and a media that serves the people is still important in our country.
